Get messages to staff over completely new comms channels

- SMS in-app notifications, newsflash banner, mass email
- Your content (documents, images, links, etc.) to the right person at the right time

Avoid information overload by targeting your messages

- Use the sophisticated CRM system to capture user preferences (e.g. interests, roles, professional groups or demographics)
- Deploy messages to interest groups
- Schedule communications for greater impact

Boost compliance

- Assign policies, procedures & clinical pathways to groups of staff
- Deploy automatic notifications when policies are updated
- Check the usage stats to monitor compliance

Increase efficiency

- Set up communication timelines to automate routine communications, staff surveys, etc.
- Assign content to different staff groups (e.g. new joiners, those affected by a change programme)
- Integrate with the staff engagement app for access on the go

Stay in control of your new comms channel

- Edit every image, line of text, phone number and hyperlink in the Staff App
- Keep the staff directory up to date
- Deploy newsflash messages in the event of business continuity issues

Give your staff a voice

- Crowd-source ideas, explore barriers to change and gain real insight
- Deploy annual staff surveys and dig deeper into underlying themes
- Create as many surveys as you need, and send them to as many respondents as you like. Assign to specific staff groups to avoid overload
- Release surveys as staff enter a building or complete a trigger event

Make sure your staff have the tools to do the job

- Tell people what is expected of them through effective goal cascading
- Tell them how they are doing by cascading KPIs
- Make sure the most up to date policies & procedures are available a the touch of a button

Deliver targeted messages, making every message stand out. Engage staff in planning and service redesign. Automate your regular communication and staff surveys. Create a whole new comms channel.
